

NCOP Data Sharing Agreement

As part of our partnership with the University of Northampton (UoN) we would like to share some of the data that we hold about your child with them. The researchers at UoN will utilise the data to assess the impact of a range of initiatives designed to enhance your child's educational opportunities. The data to be shared will include the student's name, DOB, gender, address, postcode, ethnicity, disability, free school meal status, carer status and attainment data. Your child will not be named in any reports. The data will be stored and used in accordance with the Data Protection Act 1988 before being transferred into the Department for Education database.
